EDUCATION

Brown University — Providence, RI
B.Sc. in Computer Science (Machine Learning & Data Science) — *Sep. 2019 – May 2023*

EXPERIENCE

Amazon (Artificial General Intelligence) — Seattle, WA
Software Development Engineer — *Mar. 2024 – Present*

- Engineered a data compliance pipeline for a Tier-1 service, scanning 153B records via AWS Glue; coordinated with Legal and Security to purge 1.8B non-compliant records, eliminating regulatory risks and saving $500K annually
- Architected an ML artifact down-classification service adopted by 12 research teams, integrating AWS Macie detection, CloudWatch alarms, and DynamoDB audit logging to prevent sensitive PII and model leakage
- Won 1st Place in AGI organization's Hackathon: Built a multi-agent incident response service using Bedrock Agents and RAG (Amazon Kendra) to enable autonomous cross-team SEV triage and accelerate first-response resolution
- Secured 750+PB of pre-training data accessible via 16 HPC Kubernetes clusters; engineered least-privilege auditing detection service, which remediated 10+ unauthorized exfiltration paths and unsafe FSx mount configurations
- Developed a Python self-service CLI for IAM role provisioning on S3 storage; automated security verification to reduce onboarding time by 90%, saving 103+ days of engineering capacity in 2025
- Implemented onboarding automation for Model Registry platform via infrastructure provisioning (S3, IAM, CFN) and integration tests for 200+ models, cutting deployment latency by 83% and eliminating manual overhead
- Authored 8+ design docs, mentored an intern to launch, conducted technical interviews, and led scrum operations; achieved "Exceeds Expectations" and "Role Model" ratings in 2025 performance review

Amazon Web Services (Industrial Products) — Washington, D.C.
Software Development Engineer Intern — *May 2023 – Aug. 2023*

- Delivered a Java microservice leveraging Elasticsearch and conditional fuzzy-match (Jaccard, Levenshtein, Manhattan) to surface 3000+ JSON blueprint documents stored in S3 based on similarity
- Conceived project architecture and business logic; earned "Exceeds Expectations" rating in performance review

Brown University Computer Science Department — Providence, RI
Undergraduate Teaching Assistant — *Sep. 2021 – May 2023*

- Instructed 500+ students across courses (CS1951a, CS1870, CS111), led labs, conducted office hours, graded assignments, and mentored final projects; topics included Racket, Python, Java, ML, SQL, and probability

Syntouch Inc. — Los Angeles, CA
Software Engineer Intern — *Jun. 2021 – Aug. 2021*

- Developed an interactive dashboard with ipywidgets, implementing filtering across 10+ attributes, and 5+ graphs
- Customized data reporting for 3+ Fortune 100 clients by creating graphs which enhanced client insights

Idealab — Pasadena, CA
Machine Learning Intern — *Jun. 2018 – Aug. 2018*

- Coded image capture program in Python, collecting 1000+ images, enhancing dataset for image recognition
- Optimized Elementary's Intel 3D Realsense camera for recognition training on Robotic arm via manual calibration

SKILLS

Languages: Java, Python, TypeScript, C++, SQL, Bash, LaTeX
Tools & Frameworks: Git, Linux, CI/CD, Testing (pytest, Jest), REST APIs, Agile, Jira
AI/ML: MCP Servers, Claude Code, Kiro, Bedrock Agents, Pandas, NumPy, PyTorch, PySpark, scikit-learn, TensorFlow
Cloud Infra: AWS (Lambda, Step Functions, DynamoDB, SQS/SNS, APIGW, IAM, CDK, Glue), Kubernetes, Docker
Interests: Alpine Hiking, Golf, Basketball, Snowboarding, Gastronomy, Philosophy, East Asian History, IR Theory
